

Component Ordering Information

Manual A Type Acrylic System

TS6

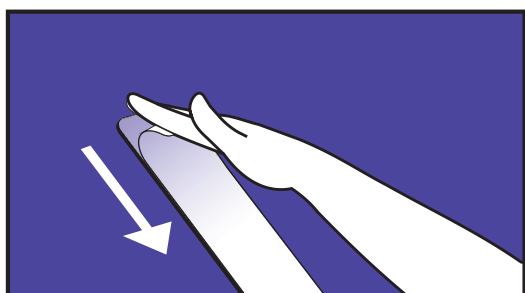

Listed below are the components you will need for your numberplate manufacturing system. They are as follows:

Wet Adhesive Reflective Panels **Dry Non-Adhesive Acrylic Plates** **Hilmaster Transfers**

Wet Adhesive Reflective Panels

The reflective is white or yellow and always printed with a logo. There is a peel off film to enable you to attach it to the acrylic. Reflective is supplied with or without a Euro GB or National flag in rolls of 25, 50, 100, 200's or flatpacked in quantities of 25. Various sizes available.

Dry (Non-Adhesive) Acrylic Plates

This is the hard, visibly clear part of the plate. It is supplied with a coloured film on the face of the plate to protect from scratches or marks. These are supplied in pack quantities of 25. Various sizes available.

Hilmaster Transfers

This product is for use with the above materials. All Hilmaster transfers are mirror image and are adhesive faced. They are applied to the Acrylic in reverse. They are supplied in pack quantities of 50 per letter or number
