

Component Ordering Information

Hiltek Thermal Print System

TS3

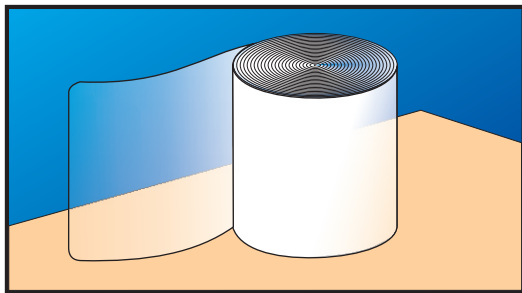

Listed below are the components you will need for your numberplate manufacturing system. They are as follows:

Wet(Adhesive) Substrates **Dry (Non-Adhesive) Optical Film** **Thermal Printer Ribbons 4" or 8"**

Wet (Adhesive) Substrate

Hard, white or yellow substrate supplied with the reflective already adhered. This has a peel off film, which reveals the adhesive part of the substrate. This can also be supplied with the Euro GB flag. They are supplied in pack quantities of 25. Various sizes available.

Dry (Non-Adhesive) Optical Film

This is supplied in rolls of 25's, 50's, 100's, 200's or in a flat-packed quantity of 25. The film is visibly clear and can be supplied plain or printed with your own or your customer's logo. It can also be supplied for the Euro GB format, or printed with a National flag on request. Various sizes available.

Thermal Printing 4" & 8" Ribbons

4" Pronto Printer

This ribbon is for use when manufacturing standard oblong plates and is supplied in packs of 3

8" Tec Printer

This ribbon is for use when manufacturing non-standard size plates and is supplied singularly

Both ribbons are fitted into the relevant printer
